## **UVitec Introduces New Rotary Screen Opaque White**

— *Unique Formulation Gives Inks High Opacity and Excellent Printability* —

Lodi, NJ (May, 2004) — UVitec Printing Ink, Inc. introduces **77-801 UV RS Opaque White**, a high opacity, brilliant white for use on combination narrow web presses.

UVitec's RS Opaque White is designed to provide an excellent print surface that will adhere to a wide variety of paper and film substrates and accept a wide variety of overprints. While this ink is designed to seamlessly integrate with UVitec's premium offset, letterpress and flexo series of inks, it is manufactured to complement most other ink systems available.

UVitec's unique vehicle structure allows maximum flexibility of the cured ink film while maintaining optimum integrity and performance. This ink can be used on most rotary screen-printing units and mesh types.

### **About UVitec**

UVitec Printing Ink, Inc. is a leading manufacturer of high quality UV curable inks and coatings. UVitec manufactures standard inks and a number of specialty products used for printing and coating cosmetic folding cartons, soda bottle labels, pharmaceutical labels, consumer product labels, business forms, lottery tickets, catalogs, and baseball cards. Founded in 1980, UVitec is recognized for its experience, service, and quality products.
